

# FUELSTAT®

## Approved field-based fuel testing for all military operations

FUELSTAT is an immunoassay antibody fuel test kit for microbe detection. It can be used wherever fuel is manufactured, stored, sold or used.

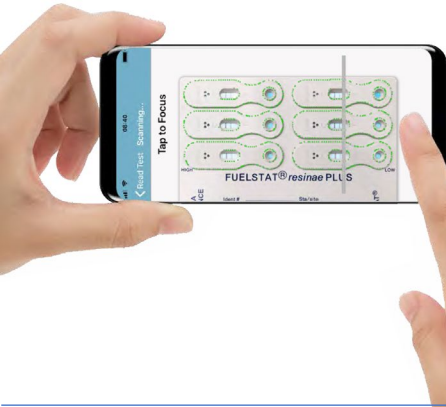

Unlike traditional tests, FUELSTAT only finds micro-organisms that do damage to fuel. The process is simple and easy to use with results back in minutes.

**FUELSTAT Resinae Plus JET FUEL TEST KIT  
P/N: FHR8-2**

### PROVEN BENEFITS

- Faster, simpler, better
- Lowest cost of result
- Reduced risk of AOG
- Less management, training, supervision
- Certainty of results
- Increased profit potential
- Easy data integration

FUELSTAT ANALYSIS REPORT	
Company name: [Redacted]	Test date: 24 Jun 2019
Address: [Redacted]	C/S Number: [Redacted]
Fuel code: [Redacted]	Country: United Kingdom
Customer reference: 124 - Porter Temples	Fuelstat result number: 1, 361
Printout date: 24 Jun 2019	
Identify: [Redacted]	Bacteria: [Redacted]
Asset: [Redacted]	Fungi: [Redacted]
Tank: [Redacted]	Hermetic resistant: [Redacted]
Fuel lot: 1	Overall result: [Redacted]
Fuelstat test kit: HR 8 JET	Test method: ASTM D8070-16

**FUELSTAT® has OEM listings from Airbus, Boeing, Bombardier, Embraer, Fokker amongst others...**

FUELSTAT® meets the ASTM International D8070-16 Standard

FUELSTAT® is listed as an approved product by Joint Inspection Group

FUELSTAT® is listed as an approved product by IATA. Conidia Bioscience is a Strategic Partner with IATA.
